

Monthly Routine — what to do and say for each client

Benjamin Branson Bookkeeping · first draft 2026-10-01 · mark it up after a few real months, then we'll reorder from your actual voice history

The rule of the order: get the data in → categorize → reconcile → review exceptions → report. Findings come *after* the bank work, because many findings disappear once the bank activity is entered. **Every number she says comes from the client's books. [YOU] = a step you do yourself (she can't).**

A. Normal recurring month (about 30 minutes)

#	Say	What it does	Why now
1	"when did we last sync"	Says how fresh the data is.	Never review stale numbers.
2	"go to bank feed cleanup"	Opens statement lines with nothing posted in QuickBooks.	Get the data in first.
3	[YOU]	In QuickBooks: add or match every missing bank line, then press Sync .	Voice never enters transactions.
4	"show me the uncategorized transactions"	Count and total of items with no real category.	Categorize before reconciling.
5	[YOU]	In QuickBooks: reconcile each bank and credit-card account to its statement.	QuickBooks has no way for the app to confirm this.
6	"status update"	Open findings and dollars.	Now see what's left.
7	"pull up the duplicates"	Duplicate pairs and dollars at risk.	
8	"pull up the negative balances" then "suspense"	Overdrawn accounts; suspense and clearing balances.	These should be zero at month end.
9	"who owes us"	Receivables: gross, credits, net, how much is 60+ days old.	Collections.
10	"what do we owe"	Payables total and past-due.	Bills.
11	"what's our cash balance"	Total bank balance.	Compare to the statements.
12	"what's our revenue this month" then "what's our net income"	The month's result.	Sanity check before sending.
13	"go to month end close"	The month-end checklist.	Attest each step.
14	"go to close package"	The client report.	Last. Send only if the confidence rating isn't Low.

B. New client — catch-up (before any regular month)

#	Say	What it does
1	"go to client diagnostics"	The 24-month picture: trends, problem months.
2	"go to cleanup assessment"	Total dollar exposure and recommended cleanup scope — the basis for your quote.
3	"pull up the negative balances" then "suspense"	The biggest signs of a messy file.
4	Work the oldest month first: steps 2–5 of the table above, then "go to month end close" .	Finish and reconcile one month completely before starting the next — balances carry forward.
5	Repeat month by month until you reach the current month, then switch to routine A.	
6	Do not send a client report for any month that isn't reconciled.	The report's confidence rating will say Low until it is.

Not in the list because the app can't do them by voice: entering transactions, reconciling, changing QuickBooks. Those always happen in QuickBooks, by you.
